Parents Guide

LEARN THE PIANO FOR BEGINNERS

LEARN THE BASICS OF THE PIANO. A BEGINNERS GUIDE!

Learn the Piano

Welcome to the beginners guide to learning the piano.

In this quick guide you will learn the foundations of the piano. Learning the keys and where they are is especially important for beginners or parents who wish to support their child.

Learning to play the piano is good for those who wish to support their child to develop confidence and other personal development skills. It is also good for those who want to develop their own skill.

If you wish to continue learning click the button below to book a free taster lesson with Templesprings Music Centre.

The Layout Of the Keyboard

**Note both keyboard and piano have the same keys. If you know how to play the keyboard, you will know how to play the piano!*

The keyboard is combined of white and black keys.

When looking at the pattern of the black keys on the keyboard, you can see that there are groups of 2 and 3 black keys that repeat throughout.

The Layout Of the Keyboard

Therefore the names of the keys will repeat throughout the whole layout of the keyboard making it easier for students to remember them.

It is helpful to know the names of the keys from memory as it is much easier to find the right keys when learning the songs.
